

EXECUTIVE PROGRAMME COMMITTEE

The International Harm Reduction Conference is supported by an expert international Programme Committee made up of harm reduction professionals, people who use drugs, people living with HIV, researchers, and advocates. Brought together by Harm Reduction International, their role is to review the accepted abstracts and create a high quality, topical and engaging programme that speaks to the key issues in harm reduction and draws out the conference themes.

The knowledge and experience of the Programme Committee ensures that the highest quality presentations, on a wide range of topics, are chosen.
