Mr Yuri Fedotov  
President  
United Nations Office on Drugs and Crime  

Dear Mr Fedotov,

Re: UNODC must call on the Sri Lankan authorities to halt the imminent executions for drug-related offences; the first in 43 years

Harm Reduction International (HRI) and 117 co-signing organisations are writing to draw your attention to official reports that the Sri Lankan authorities intend to execute at least four people for drug-related offences as soon as Saturday 29 June, and urge you to issue a public statement on behalf of the United Nations Office on Drugs and Crime (UNODC) calling on Sri Lanka to halt such executions.

In July 2018, President Sirisena expressed his intention to end a 43-year moratorium and resume executions of individuals on death row for drug trafficking. This proposal has been approved by the Sri Lankan cabinet, and the decision has since been reiterated several times.

Preparations are now reportedly underway to execute prisoners on death row for drug offences as part of the so-called National Drug Eradication Week, between 21 June and 1 July. On Wednesday 26 June, the President of Sri Lanka announced that four execution warrants have been signed. According to reliable sources, executions appear to be set for as early as this Saturday, 29 June. The lives of at least 46 more death row prisoners are also under imminent threat as their execution warrants have been prepared and now just await the President’s signature.

Executions for drug offences are prohibited under international human rights law, as drug offences do not meet the threshold of ‘most serious crimes’ to which Article 6.2 of the International Covenant on Civil and Political Rights mandates that capital punishment be restricted, in retentionist countries. The UNODC has repeatedly called on states that retain the death penalty for drug offences to commute all existing death sentences, and to consider abolishing the death penalty altogether.

Remaining silent as Sri Lanka puts an end to a 43-year de facto moratorium on executions would strike a blow to UNODC’s commitment to human rights compliance as a core principle of international drug policy.

In view of this, we urge UNODC to publicly call on the Sri Lankan authorities, in the strongest possible terms, to immediately halt the impending execution of prisoners convicted of drug offences, to commute all existing death sentences, and to abolish the death penalty on these grounds.

Thank you for your attention,

Naomi Burke-Shyne  
Executive Director, Harm Reduction International
